

जल ही जीवन है
PRESERVE IT

ABOUT US

Atlas Water Management is a new innovative company, engaged in Surface Water Management i.e. rain water and flood water management so as to prevent enormous loss of life and property, prevent spread of disease, preserve agricultural property and save animals. The company aims at creating desirable environment by preserving surface water in a satisfactory manner. The company also aims at creating employment to fellow citizens esp. young people.

Sand of various sizes and varieties coupled with gravel and brick blast plays important role in water purification. At times upper layer may have to be partially replaced after use. It refreshes the sand filter for fine working.

VISION

The company aims to provide employment to the deserving persons.

The ultimate motive of the company is to create green environment with the help of all for all the people.

ACF performs the important duty of eliminating foul smelling gases e.g. Hydrogen Sulphide, Carbon Dioxide etc. It also establishes normal color of water.

Flow of water through pipe may be measured with the help of Flow Meter and Rota Meter.

MISSION

Our mission is to understand the problems of society caused by severe, recurrent and devastating rains & floods.

UF enhances the quality of water to a vast extent.

Water may be rendered free from bacteria, viruses and other micro organisms with the help of Ozone, Chlorine and UV treatment.
